

A series of career development workshops was organized for students to improve confidence, encourage openness to opportunities, and make them more adaptable and flexible. Students with entrepreneurial mindsets are able to take initiative and see problems as opportunities. Students are also creative and adaptable, which makes them well-suited for changing job markets.

These workshops also aimed at helping students to break or make their life and to stay ahead of the competition.

## Kickstarting Your Career Seminar 22 Nov 2022

Entrepreneurial mindset is not only sought by employers in different companies, but also in different industries. Ms. Connie LAM, Former Executive Director of Hong Kong Arts Centre, shared with us "Art & Entrepreneurship" and how she applied it to the annual Hong Kong Arts Festival, a signature event connecting Hong Kong and the world.

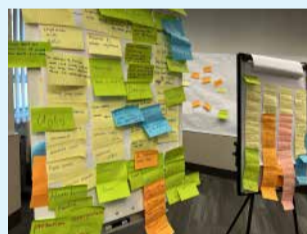

## Growth Mindset Workshop 3 Nov, 29 Dec 2022

This two-part workshop aims to teach students what growth mindset is and the positive impact to their life in the long run. Students also learn how to face failure and disappointments as learning opportunities. Ms. Elaine TONG, Director of Tobira Consulting Company Limited & HKBU business Alumna is the facilitator of the Workshop.

## Unleash The Creativity Beast in You! Workshop 19 Nov 2022

Creativity skills can be learned! Facilitated by Mr. David THOMAS, Managing Partner of Profound Knowledge Partners Asia Ltd., this 4-hour workshop aimed at teaching students the fundamental mindsets and skills of brainstorming and Parallel Thinking. Students also learned other creative problem-solving methods and implementation thinking tools to their ongoing study and perhaps into their future career.

## What's new

Application Form

mini BIG Details

In a 5-minute video, address the problem you are solving along with your solution. Ideas that help people, business, community, the planet or address big challenges are awesome - but an idea to solve individual problem is welcome too!

Submission Deadline:  
6 January 2023
